

# MICALIT ® F

MICALIT® F is mica based material. It has excellent thermal and chemical resistance making it suited to the high temperature conditions of the automotive and steel industry, exhaust systems, burners and ovens. It has good electrical insulation and low thermal conductivity properties.

# PROPERTIES SUPERIOR EXCELENT VERY GOOD GOOD MODERATE THERMAL RESISTANCE CHEMICAL RESISTANCE SEALABILITY PERFORMANCE

| Composition | Mica flakes (phlogopite), silicon resin. |
|-------------|--|
| Colour      | Yellowish-brown                          |

### TECHNICAL DATA Typical values for a thickness of 2 mm

| Density                    | DIN 28090-2 | g/cm³ | 1.9      |
|----------------------------|-------------|-------|----------|
| Compressibility            | ASTM F36J   | %     | 20       |
| Recovery                   | ASTM F36J   | %     | 35       |
| Loss on ignition           | DIN 52811   | %     | <8       |
| Stress resistance          | DIN 52913   |       |          |
| 50 MPa, 16 h, 300 °C       |             | MPa   | 38       |
| Max. operating temperature |             | °C/°F | 950/1742 |

|                               | Sheet size (mm): 1000 x 1200                               |
|-------------------------------|--|
| Dimensions of standard sheets | Thickness (mm): 0.4 - 3.0                                  |
|                               | Other dimensions and thicknesses are available on request. |

| Air (gas)                             | + |
|---------------------------------------|---|
| Argon (gas)                           | + |
| Asphalt                               | + |
| Bio-diesel                            | + |
| Borax                                 | + |
| Calcium chloride                      | + |
| Carbon dioxide (gas)                  | + |
| Carbon monoxide (gas)                 | + |
| Flue gas (Exhaust/Coke oven)          | + |
| Fuel oil                              | + |
| Hydraulic oil (Mineral type)          | + |
| Hydraulic oil (Phosphate ester-based) | + |
| Mineral oil (ASTM no.1)               | + |
| Motor oil                             | + |
| Naphtha                               | + |

| Nitrogen (gas)                 | + |
|--------------------------------|---|
| Nitrous gases (NOx)            | + |
| Oxygen (gas)                   | + |
| Paraffin oil                   | + |
| Petroleum (Crude oil)          | + |
| Potassium chloride             | + |
| Potassium nitrate              | + |
| Sodium aluminate               | + |
| Sodium chloride                | + |
| Sodium silicate (Water glass)  | + |
| Steam                          | + |
| Sulfur dioxide (gas)           | + |
| Tar                            | + |
| Transformer oil (Mineral type) | + |

## CHEMICAL RESISTANCE CHART

The recommendations made here are intended to be a guideline for the selection of the suitable gasket quality. Because the function and durability of the products depend upon a number of factors, the data may not be used to support any warranty claims.

- + Recommended
- ? Recommendation depends on operating conditions
- Not recommended
